CHAIRMAN'S MESSAGE

Divex Marine are now among the top marine contracting companies in the United Arab Emirates and continuously expanding our operation in other Gulf Countries. It is all because of our management's vision, high quality of work, capabilities of our employees and newest construction equipment. We are committed to excellence, ingenuity, reliability, quality, and prompt delivery in all projects. The company growth is based on a commitment to our people, who represent our most valuable asset. We owe a significant amount of our success to our dedicated and committed staff, which worked together as a team and, of course, our customers. Customer satisfaction is important to our growth in the future and we are committed to it. We have decades of experience in delivering innovative and sustainable services to a range of clients from the public and private sectors; we continue to look forward. We will continue building the future.

COMPANY PROFILE

Divex Marine Contracting LLC is a leading marine contracting company based in the United Arab Emirates. With over 40 years of experience, the company has established itself as a trusted partner for clients across various sectors, including oil and gas, renewable energy, ports and harbors, and marine infrastructure.

Divex Marine Contracting LLC offers a wide range of services, including marine construction, dredging, offshore services, and marine logistics. The company has a team of highly skilled professionals who are committed to delivering exceptional service, prioritizing safety, quality, and environmental responsibility.

The company has completed numerous projects across the UAE and the wider Middle East region and Africa, including the construction of offshore platforms, port facilities, and coastal protection structures. Clients trust Divex to deliver on time, on budget, and to the highest standards of quality and safety.

QUALITY POLICY

The Divex Marine offers services for its projects with focus on time, cost and quality to ensure added value in order to satisfy the customer and we are committed to continual improvement in quality and productivity. We hold internationally recognized quality, safety and environmental assurance accreditations ISO 9001, 14001, 18001

OUR VISION

Our vision is to deliver the highest quality work through innovation, increased competitiveness, efficient use of all resources, proactive approach to business while protecting its environment and being the best in our field.

HSE POLICY

Our HSE policy is founded on the following principles.

Health: We seek to conduct our activities in such a way to promote the health of and avoid harm to our employees, visitors and the wider community.

Safety: We seek to conduct our activities in such a way to promote the health of and avoid harm to our employees, visitors and the wider community.

Environment: We are committed to protecting the environment in our operations and we adopt techniques that promote sustainable development. We conduct periodic audits and risk assessments of all our activities process and productios for setting annual targets to enable our improvement to be measured, monitored and improved.

OUR MISSION

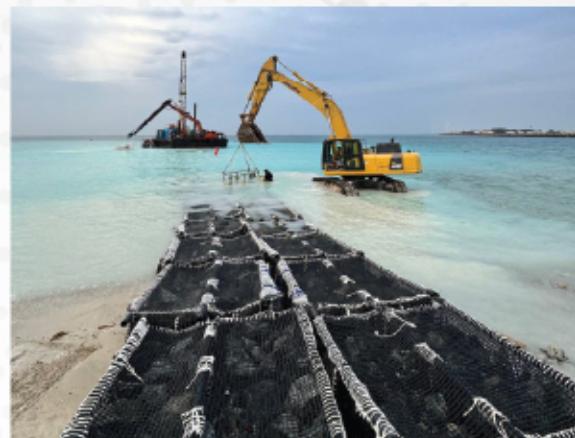

To earn its reputation as a reliable and respected marine contractor, aims to continue creating value for all of its stakeholder by executing challenging projects.

OUR SERVICES

Since inception, Divex Marine has been involved in many challenging and technically complex projects while delivering and exceeding our customers' expectations. Our people understand the importance of working as a team by pooling our talent and experience from design to final construction.

Following is the list of our services;

-  Port Construction
-  Onshore and Offshore Pipeline Works
-  Submarine Cable Laying & Installation
-  Piling Works
-  Breakwaters and Rock Revetment
-  Dredging and Reclamation
-  Floating Marinas
-  Beach Construction
-  Slipway Construction
-  Stormwater, Freshwater & Drainage
-  Water Systems
-  Marine Environmental Protection
-  Equipment for Hire
-  Diving Services

**DELIVERING & EXCEEDING
CUSTOMERS EXPECTATIONS**

PORT CONSTRUCTION

Ports and Marine infrastructure require specialized Equipment, Knowledge and Experience which Divex Marine Contracting is ready to provide. We bring strategic approach to your Marine Construction Projects from inception through completion within Contractual time, Quality and Budget.

Divex Marine is one of the Pioneers in providing cost-effective tailor-made steel foundation solutions. We have consolidated experience to fulfill the Client specific requirements.

PORTS & MARINE CONSTRUCTION SERVICES EXPERTISE

PORT BASIN AND CHANNEL DREDGING

We have In-house design and Construction capability by offering turnkey solutions to execute large-scale port construction projects.

Our experience in Marine Infrastructure Construction spans a diverse array of more than 30 years of different project types, meaning we're prepared to exceed expectations no matter what your unique project requires.

SUBMARINE CABLE LAYING & INSTALLATION

At Divex Marine Contracting we specialize in delivering cutting-edge submarine cable laying services. As global communication demands continue to grow, the need for reliable, high-speed, and secure underwater cable networks has never been greater. Our expertise in submarine cable installation ensures seamless connectivity.

ROUTE SURVEY & PLANNING
CABLE INSTALLATION & DEPLOYMENT
BURIAL & PROTECTION
MAINTENANCE & REPAIR

Whether you're planning a new submarine cable project or need support with an existing network, Divex Marine Contracting is here to help. Contact us today to learn more about our services and how we can support your connectivity needs.

PIPELINE SUPPLY & INSTALLATION

Being one of the leading contractors for pipelines installation. We have capabilities and expertise to offer full range of project services encompassing project engineering, supply, installation, commissioning & maintenance services for pipelines and Flowlines- Intake and Reject Pipelines for RO Plants, Portable Water pipelines both on shore and offshore.

We have experienced manpower resources to deliver projects on time, on budget and within international standards of environment, health and safety. We are committed to offer our high-quality services for pipeline installation from design, procurement, installation, handing over and maintenance.

DESIGN
ENGINEERING
SUPPLY
INSTALLATION
COMMISSIONING

We offer our clients solutions to their Marine infrastructure while managing the entire process from design to completion.

**EXTENSIVE
EXPERIENCE ON
LATEST DESIGN
TECHNIQUES**

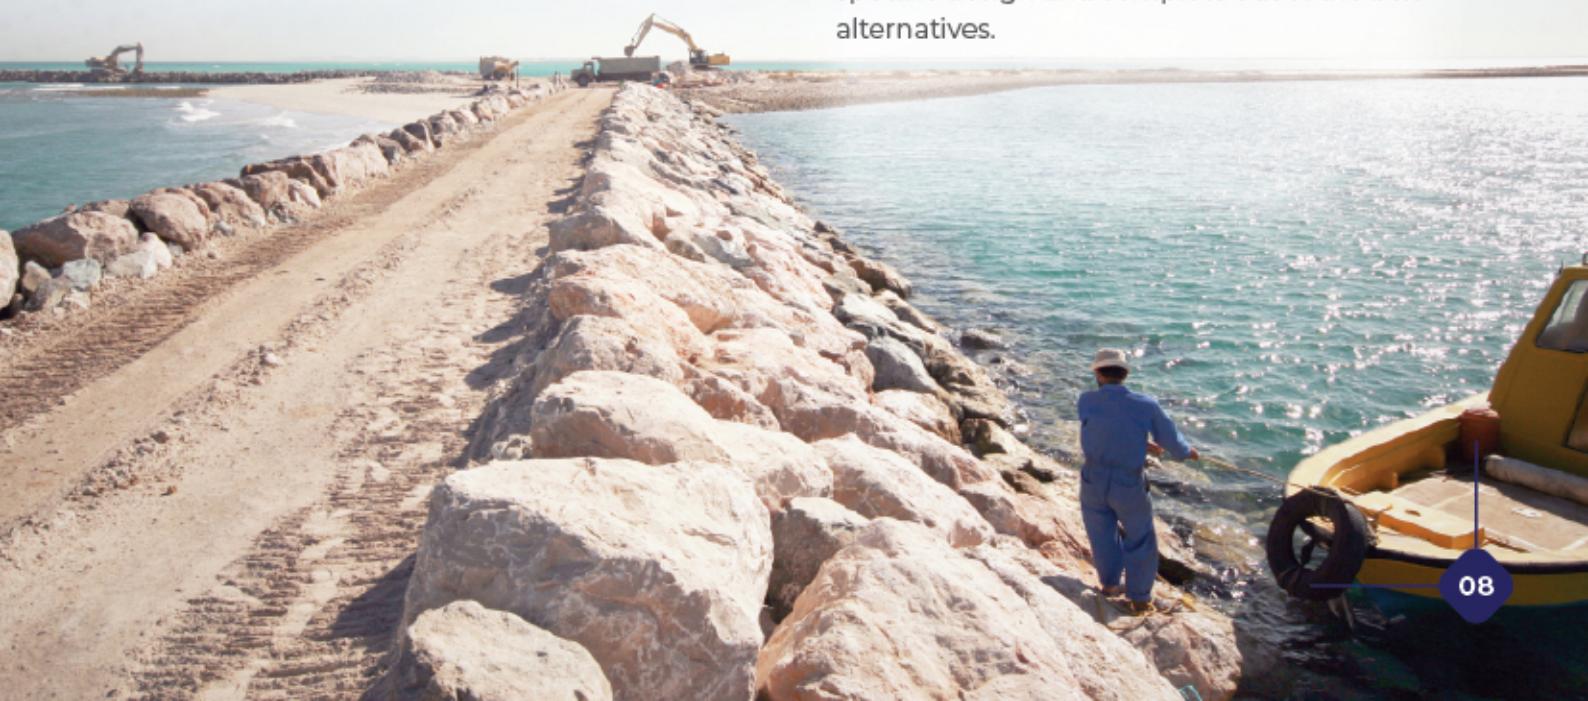

BREAKWATER & ROCK REVETMENT

Breakwaters are substantial part of port and beaches. They often contribute a large part of capital cost of port and beaches. Moreover, Revetments and Breakwaters provide protection of port and beaches associated structures on the shoreline from extreme wave conditions and coastal erosions. That's why they are essential to be constructed efficiently and effectively both as per quality and cost perspectives. The breakwater and revetment design must be reliable and sufficiently stable while costs should be kept as minimal as well. All this requires extensive experience on latest design techniques and experience to receive more efficient design.

DESIGN & CONSTRUCT EFFICIENTLY & EFFECTIVELY

We are one of the top marine constructions in the GCC region. We provide our client specific design and complete out of the box alternatives.

DREDGING AND RECLAMATION

We possess over 35 years of experience in the undersea excavation and dredging. Keeping waterways and ports navigable, creation of new ports, coastal protection, land reclamation.

Divex Marine have a wide experience in dredging and reclamation, we have executed projects in various locations across the UAE. Our equipment has been engineered specifically to fit different needs deepening of ports, harbours and waterways in addition to general maintenance dredging to ensure water ways remain clear and safe to navigate. We pride ourselves on being one of the most efficient dredging service providers.

FLOATING MARINAS

We have extensive experience in designing, rehabilitating, installing and maintenance of floating marinas in aluminum, concrete, PVC and composite materials in all sizes and layouts to provide our clients with a durable and safe place to moor their vessels.

Our team of professionals will give each project a fresh prospective in discussing your individual requirements and offering viable alternatives to ensure your project remains within budget and delivered on time.

BEACH CONSTRUCTION, RENOVATION & MAINTENANCE

At Divex, we specialize in providing comprehensive solutions for beach construction, renovation, and maintenance. With years of expertise and a dedicated team of professionals, we offer a range of services tailored to meet the unique needs of coastal properties and waterfront developments.

1. Beach Construction Design and Build:

Our beach construction services encompass the design and development of stunning coastal landscapes. Whether it's creating new beachfront areas or enhancing existing shorelines, we leverage our expertise in coastal engineering and design to craft innovative solutions.

2. Renovation and Maintenance:

We understand the importance of preserving and enhancing coastal assets. Our renovation and maintenance services are aimed at revitalizing and maintaining the beauty and functionality of beachfront properties. Our offerings include:

3. Beach Cleaning Services:

Maintaining pristine and litter-free beaches is essential for ensuring a positive visitor experience and protecting coastal ecosystems. Our beach cleaning services are designed to keep shorelines clean and attractive.

BEACH CONSTRUCTION AT PRESIDENTIAL PALACE

Commissioned by the Ministry of Presidential Affairs, the project involves the comprehensive design and execution of coastal engineering and beach development works as part of the enhancement of the beachfront at the Presidential Palace in Abu Dhabi.

SLIPWAY AND LANDING CRAFT LANDING

SLIPWAY

Marine slipways offer a cost effective quickly constructed solution. Divex Marine have many years' experience in the design and construction of temporary and permanent slipways.

Our temporary slipways solution can be installed in minimal time giving quick access permanent solutions taking only slightly longer.

SLIPWAYS SOLUTION CAN BE INSTALLED IN MINIMAL TIME

LANDING CRAFT RAMPS

Cargo, vehicles, passengers and building materials can all be hauled by shallow draught landing craft. Where there are no fully functioning or well-developed wharfs and docks, landing craft offer a cheap cost-effective solution to your logistics requirements.

We have substantial expertise in the design, engineering and construction of Ramps.

PUMP HOUSE

At divex we specialize in providing comprehensive solutions of pump room and pipeline systems for pump houses. With our extensive experience and expertise in marine engineering, we offer innovative design, installation, and maintenance services tailored to meet the diverse needs of our clients in the marine industry.

1. Pump Room Design and Installation:

Our pump room design and installation services are aimed at optimizing the performance and efficiency of pumping systems in marine environments.

2. Pipeline Systems for Pump Houses:

We specialize in the design, installation, and maintenance of pipeline systems for pump houses, ensuring reliable and efficient transport of fluids. Our services include:

- Pipeline route planning and alignment studies
- Selection of appropriate pipe materials and specifications
- Installation of pipelines using advanced techniques
- Pressure testing, flushing of pipelines

3. Maintenance and Repair Services:

We understand the critical importance of maintaining operational efficiency and reliability in pump room and pipeline systems. Our maintenance and repair services are designed to ensure the ongoing performance and longevity of pumping infrastructure.

Seawater & Freshwater Pump Room

WATER RESERVOIRS, LAKES, AND WATER STORAGE SYSTEMS

At Divex we specialize in providing comprehensive solutions for the design, construction, and management of artificial water reservoirs, lakes, and water storage systems. With our expertise in marine engineering and environmental management, we offer innovative and sustainable solutions to meet the diverse needs of our clients.

1. Design and Construction:

Our team of experienced engineers and designers collaborates closely with clients to create custom-tailored designs for artificial water reservoirs, lakes, and water storage systems. We utilize advanced modeling and simulation techniques to optimize water management and ensure environmental sustainability.

2. Water Storage Systems:

We provide a range of water storage solutions tailored to meet the specific requirements of our clients. Whether it's for agricultural irrigation, industrial processes, or municipal water supply, our water storage systems are designed for reliability, efficiency, and longevity.

ARTIFICIAL REEF (DESIGN & BUILT)

At Divex marine contracting , we are committed to supporting the United Nations' Sustainable Development Goals, and in particular, Goal 14.2, which aims to protect and restore marine ecosystems and promote sustainable use of marine resources. We are proud to contribute to this goal through our innovative artificial reef solutions, which provide a sustainable habitat for marine life, promote biodiversity and support the regeneration of damaged or degraded coral reefs. Our artificial reef structures are designed to mimic natural reefs and provide a stable substrate for the attachment and growth of corals, sponges, and other marine organisms.

MANGROVE TRANSPLANTATION

Mangroves are an essential part of the coastal ecosystem. In fact, mangrove forests are one of the most useful ecosystems on Earth, storing up to ten times more carbon than tropical forests. As our continuous commitment to environment, we provide services for both Mitigative and Stand-alone Mangrove planting Projects.

SEAGRASS TRANSPLANTATION

Seagrass is group of flowering plants that can survive underwater and grow in shallow coastal waters. They are also called "lungs of our seas". They are the major source of oxygen; one square meter of seagrass can generate approximately 10 liters of oxygen every day. They are essential for the survival of dugongs and UAE is home to second largest population of dugongs in the World.

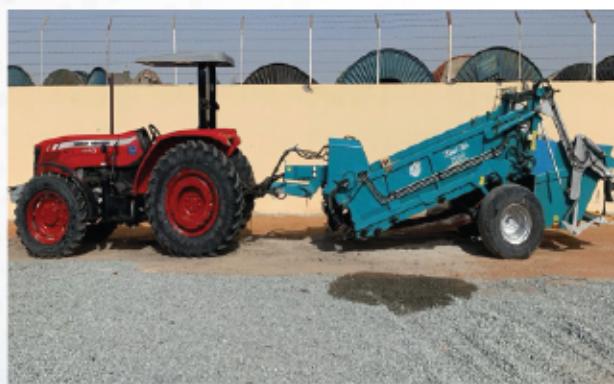

EQUIPMENT HIRE

Our Fleet of equipment is the best fit for fulfilling your marine construction project requirements. The overall Fleet is made out of Barges with a capacity range of 500 Tons to 2500 Tons, Cutter Suction Dredger with a mixer capacity (maximum) 2500 m³/hr. Tug boats 1700 HP, Workboats, and Barges with Cranes and Excavators.

That Fleet is based in and deployed from Abu Dhabi, UAE, with complete facilities including maintenance, repair, docking, slipway, and mobilization vessels.

We have a house engineering department that takes care of the Fleet from operational preparedness, mobilization, and demobilization to seamless project delivery to our clients.

DIVING SERVICES

**SURVEY / INSPECTION /
UNDERWATER WORKS)**

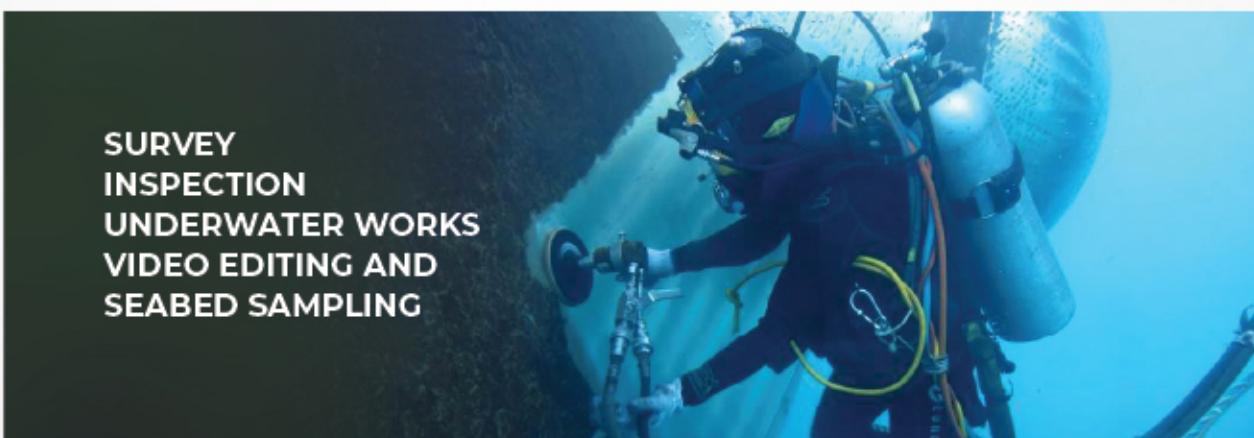

Divex Marine started commercial diving since 1988. We had a wide range of experience in underwater operations and specialized in diving operations. We have successfully completed many years of difficult projects for many industries.

We earned a reputation around the country for the exceptional service and keeping safety as our top priority. Apart from the above services we also design, develop and construct surface and sub-surface equipment for maritime sensors, video imaging and seabed sampling.
